

I have recently become aware of the NAB's petition 04-160 which I am opposed to and respectfully ask that you reject. I presently subscribe to XM Radio for service in my automobile. I am paying for the right to listen to their broad entertainment and informative services including the weather and traffic conditions. This is a valuable service especially for those whose jobs depend on travel in this country. Truck drivers, salesman, businessman, even the average consumer all benefit from having these 24 hour instant services. For those of us who do choose to subscribe to Satellite Radio, please do not restrict these services which can make our travels/life a little safer and more efficient .
